PART- Synopsis & Director's Note

Log Line: GABRB3 is a 10 minute short drama film about a boy named Carl tries to break his social barrier but fails.

Synopsis: This film shows that Carl's classmate let him attend the graduation ceremony. He has intense ideological struggles and tries to break through the inner fears of the dense crowd but eventually he still fails to overcome himself. Carl has intelligent for computer engineer; he uses computer software to create a virtual space, which could let him find some memory pieces about himself that he ignored before. He could bring back some little things that happened in life, such as one day he ignores someone's request for help. In that space he could redo that thing again. It seems like he could be normal in that virtual world. However, in the real world the same thing happened again, he still can't be like a normal person.

Director's Note

A film could help the audience know and understand people with some kind of disabilities to take care of them. It also is my motivation to make this film. Through this film, I want to let audience notice and understand someone in our life is smart, but they don't know how to communicate with others and sometimes their behavior is clumsy. We need to give more patience and help to this group of people than to ridicule and despise them. we also could try to understand (comprehend) them and not just leave them alone.

JACK WALSH

As Carl Stone

CHERLY MOK

As Zoe

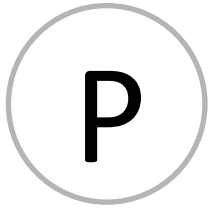

GREG QUIBELL

As David

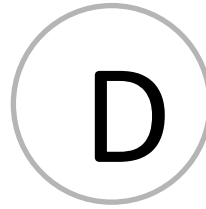

LUANA ALDEA

As Louise

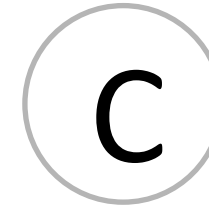

Producer

Yiwei Zhang

Director

Guanghua Zhou

Camera Operation

Guanghua Zhou

TAPSMEDIA

Love it ! Animation looks great. Audio mix very well and good sequence color.

Tbphotovideo

I think it's a good final year peace, especially from the way it looks, a lot more professional than some of the others that will be turned in.

Beyondbitcoinfilm

I think some of your camera techniques do not necessary fit, but an interesting concept, I think you are on the right path.
